12	Final Project	Microsoft Professional Capstone: Front-End Web Development

TRACK CHANGES

Front-End Web Development

Starting July 1, we're updating the courses and skills required to complete the Front-End Web Development track.

FAQ

Q: Why are the Microsoft Professional Program tracks changing?

A: Tracks are routinely evaluated for industry relevance. In some cases, we may replace a course, add new courses and skills, or simply rename an existing option.

Q: Do changes affect tracks completed before July?

A: No. If you completed a full track before July 1, updates won't affect you. You can still take new courses, but it's not required to keep your track certificate.

Q: Do I get credit for courses that are no longer part of my track?

A: If you completed a previous requirement before July, you still get credit. If you didn't successfully complete before July, you need to follow the new track requirements.

Q: What if my track is still in progress?

A: If you have yet to complete a skill, refer to the new requirements. If a course is currently on edX, you can take it now. Credit will appear on your dashboard once changes take effect July 1.
